CAREER OBJECTIVE

Motivated and enthusiastic Bachelor of Information and Communication Technology (BICT) undergraduate at the University of Jaffna with a strong interest in Computer Networking and Network Administration. Passionate about networking technologies, routing and switching, IP addressing, subnetting, network troubleshooting, and network security. Seeking a Network Engineer Internship to apply technical knowledge, gain practical industry experience, and contribute to maintaining reliable and secure network infrastructures while developing professional networking skills.

EDUCATION

Bachelor of Information and Communication Technology (BICT) University of Jaffna, Vavuniya Campus	Apr 2022 – Present
G.C.E. Advanced Level Examination (Engineering Technology Stream) Poramadulla Central College	Jan 2018 – Dec 2020
G.C.E. Ordinary Level Examination Poramadulla Central College	Jan 2016 – Dec 2017

TECHNICAL SKILLS

Networking - TCP/IP Protocol Suite - OSI Model - IPv4 Addressing & Subnetting - Routing & Switching - Static & Dynamic Routing - VLAN Configuration - DHCP & DNS - LAN/WAN Technologies - Wireless Networking (Wi-Fi) - Network Security Fundamentals - Network Troubleshooting - Network Design Fundamentals	Network Administration & Troubleshooting - Network Device Configuration - IP Configuration - Connectivity Testing - Network Troubleshooting - Fault Detection & Resolution
Tools & Platforms - Cisco Packet Tracer - Wireshark - Linux - Windows - Wireshark - Windows - Linux	Infrastructure - Network Cabling Concepts - Network Design Fundamentals - Basic LAN Setup - Basic WAN Setup Security - Network Security Fundamentals - Access Control Lists (ACLs) – Basic - Network Monitoring Basics - Security Best Practices

PROJECTS

Routing and Switching Practice Project

- Designed and configured a network topology using 3 Cisco routers and 3 switches in Cisco Packet Tracer.
- Configured IP addressing, LANs, routers, and switches for communication between multiple networks.
- Implemented static routing to enable communication between different networks.
- Verified end-to-end connectivity and performed basic network troubleshooting.
- Demonstrated practical knowledge of routing, switching, TCP/IP, and network configuration.
- Technologies: Cisco Packet Tracer, Static Routing, Routing, Switching, TCP/IP.

Cisco Packet Tracer Multi-Branch Enterprise Network

- Designed and configured a 3-site enterprise multi-branch network using Cisco Packet Tracer.
- Implemented OSPF dynamic routing for communication between branch networks.
- Configured Inter-VLAN routing to enable communication between different VLANs.
- Configured local DHCP pools for automatic IP address assignment.
- Implemented NAT/PAT to provide internet access for internal networks.
- Applied Extended ACLs to improve network security and control traffic.
- Technologies: Cisco Packet Tracer, OSPF, VLAN, Inter-VLAN Routing, DHCP, NAT/PAT, Extended ACL.

CERTIFICATIONS

- Networking Basics – Cisco Networking Academy
- Getting Started with Cisco Packet Tracer – Cisco Networking Academy
- Network Addressing and Basic Troubleshooting – Cisco Networking Academy
- Networking Devices and Initial Configuration – Cisco Networking Academy
- Network Support and Security – Cisco Networking Academy
- Subnetting Mastery – Cisco Networking Academy

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Quick Learning
- Time Management
- Adaptability
